DETAILED ACTION

Applicant's preliminary amendments submitted 9/21/2005 and 7/10/2006 are acknowledged. Claims 35-68 are pending and subject to the following restriction.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 35-48, 51, 64, and 65 drawn to a conformational antibody capable of specifically binding to the natural HCV viral epitope and the methods of making the said antibodies.

Group II, claim 49 drawn to a method of diagnosis, prevention or treatment of HCV infections using the antibodies of the present invention.

Group III, claims 50, 52-54, 57-59, 62 and 63 drawn to an enveloped HCV viral particles and methods of making the enveloped HCV viral particles.

Group IV, claims 55, 56, 60, 61, 66, drawn to enveloped subviral particles.

Group V, claims 67 and 68 drawn to a method of diagnosis, prevention or treatment of HCV infections using the enveloped HCV viral particles of the present invention.

The inventions listed in groups I, II, III, IV, and V do not relate to a single general inventive concept under PCT Rule 13.1 because they lack the same or corresponding special

Art Unit: 1648

technical features for the following reasons: the special technical feature of the claimed invention is the conformational antibody capable of specifically binding to the natural HCV viral epitope of an enveloped HCV viral particle, and the methods of making the said antibodies. Bartosch et al. (J. Exp. Med. Vol. 197, p. 633-642, in IDS of 9/21/2005) disclose antibodies capable of specifically binding to the natural HCV viral epitope of an enveloped HCV viral particle, and the methods of making the antibodies (see the entire document, particularly page 637).

Since Applicant's invention does not contribute a special technical feature when viewed over the prior art they do not have a single inventive concept and thus the claims lack unity of invention. Therefore, the instant invention lacks Unity of Invention and restriction is set forth as it applies to U.S. practice.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Notice of Possible Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102,

Art Unit: 1648

103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of In re Ochiai, In re Brouwer and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
